

LAPIDE

Nature's *finest*

Stone shaped by earth
refined by architecture

LAPIDE *formula*

Nature as the source

Every stone begins in the earth, honoring both the natural material and the craftsmanship behind its formation.

Timeless design at the core

Design that transcends generations, crafted with materials that do the same.

Customization & co-creation

Together with the architect, we create unique textures, finishes, and designs that bring the designer's vision to life.

Authenticity

Every stone carries the story of its origin, the craftsmanship behind it, and the creative collaboration that shapes it.

LAPIDE *Bricks*®

Clean lines meet raw elegance. LAPIDE Bricks® merge the natural depth of stone with architectural rhythm, making them ideal for modern facades or rustic textures with refined edge.

- The bricks are made of 100% natural stone, ensuring authenticity, durability, and a timeless appearance.
- Wall thickness: 70 mm, allowing the bricks to be used for solid masonry walls and traditional bricklaying applications.
- Height: 40 mm, creating a sleek and narrow façade with a refined, contemporary appearance.
- Length: 500 mm, a stylish long-format size suitable for a wide variety of masonry patterns and designs.
- Custom-made solutions are available, allowing projects to be tailored to specific design requirements and dimensions.
- The LAPIDE Bricks collection is available in multiple natural stone types, offering a diverse range of character and aesthetics.
- Each stone type can be supplied with different surface finishes, enabling distinct looks from the same material.
- Finish options range from a clean, brushed surface to a more robust, natural textured finish, depending on the desired architectural style.

LAPIDE *Rocks*

Organic and expressive, LAPIDE Rocks create bold facades full of movement and irregularity. Each surface becomes a statement: raw, mediterranean, and deeply rooted in nature.

- The LAPIDE Rocks collection is made of 100% natural stone, sourced directly from nature for an authentic and timeless appearance.
- Wall thickness varies per selection, offering flexibility for different applications.
- Available in 90-110 mm thickness, suitable for traditional masonry and solid wall construction.
- Also available in a thinner format of 2–5 cm, ideal for wall cladding and façade applications.
- Suitable for both interior and exterior use, making the collection versatile for a wide range of architectural projects.
- Lengths are variable, with a minimum of 200 mm, creating a truly natural and organic effect.
- Heights come in a mixed range of 40–80 mm, enhancing the dynamic and rustic character of the stonework.
- The stones feature a natural surface finish, allowing the raw and genuine texture of the material to stand out beautifully.

LAPIDE *Tiles*

From exterior to interior, LAPIDE Tiles offer seamless transitions. With various finishes and formats, they bring tactile refinement and visual calm to floors, walls and terraces.

- The LAPIDE Tiles collection is made of 100% natural stone, offering a durable and authentic surface with timeless character.
- Suitable for both interior flooring and exterior terraces, allowing the floor design to flow seamlessly from inside to outside.
- Available in a range of natural earth tones as beige, grey, and cream, creating warm and elegant architectural finishes.
- The tiles can be custom-made in terms of colour, dimensions, and surface treatment, ensuring maximum design freedom.
- This flexibility allows for various laying patterns, from a modern layout to a classic Roman pattern.
- Lengths and heights range from 100 up to 1000 mm, enabling both subtle and bold tile designs.
- The tiles can be produced in 20, 30, or 40 mm thickness, depending on the application and project requirements.
- The LAPIDE Tiles collection is also available in flagstones.

LAPIDE *Pavers*

LAPIDE Pavers are made to shape outdoor paths and patios with quiet elegance. Choose between timeless patterns like herringbone or rustic blocks for natural landscape harmony.

- The LAPIDE Pavers collection is suitable for both garden projects and large-scale landscape developments, combining durability with natural elegance.
- The collection is available in two standard sizes, offering flexibility in design and application.
- The first format consists of compact cobbles of 100 x 100 mm, ideal for detailed paving patterns.
- The second format is a typical Dutch size: 210 x 50 x 40 mm, perfectly suited for classic laying patterns such as herringbone.
- The pavers can be produced in 20 or 40 mm thickness, depending on the project requirements and intended use.
- These natural stone pavers provide excellent opportunities for creating a variety of paving patterns and layouts, from modern to traditional designs.
- Custom-made options are available upon request, allowing tailored solutions for specific architectural or landscape projects.

LAPIDE *Studio*

At LAPIDE, we believe the best ideas are shaped together. That's why collaboration with architects and designers is at the core of what we do. From the first sketch to the final detail, we offer hands-on expertise to explore how natural stone can elevate your project, not just as a surface, but as a meaningful part of the design language. Whether it's choosing the right texture, defining a custom format, or developing a unique finish, we think alongside you. LAPIDE Studio is where material knowledge and creative vision meet. Always guided by craftsmanship, curiosity, and respect for the stone's natural rhythm.

CO-CREATED
With you

A hand with light-colored nail polish is holding a thin, rectangular piece of light-colored stone. The hand is positioned over a larger, irregularly shaped piece of stone. In the background, there is a roll of stone with a wavy, ribbed texture. The entire scene is set against a dark, textured background.
